

Please reject NAB's petition 04-160. XM radio is a great service that I pay for and I love it. The traffic and weather channels are so useful. I drive a lot of highways to get to and from work and I depend on the channels to know what is going on. Regular radio doesn't provide the kind of information I need to decide the fastest way to get home. The services from XM radio are paid for and NO ONE XM the service provider should decide what I can hear. The National Association of Broadcasters has no right to tell me or XM what to broadcast! What's next?? The govt telling me what kind of hair cut my barber can give me?? I pay for a service when it is offered a certain way! LEAVE XM ALONE!!! Ray Jay
